### Introduction

....Don't be impressed by the obsolete terminology of the introduction, which properly is the one of the Holy Scriptures and reached us through thousands years.

On the whole, instead, it has properly to do with what it is written in it, besides the scientific texts quoted in the bibliography. My assignment was to "receive" and recognize the "Password" needed to decode sentences, numbers and events otherwise incomprehensible.....

....We can compare this work to a big gold nugget given to an Aboriginal: he wouldn't know any value for his life and would eventually throw it against a kangaroo passing by to kill him and feed himself and his family.

This metaphor means that this work has an inestimable value in the course of time as well as when the Aboriginal is brought in the western world he will then comprehend the huge value that "stone" as for the western world, but he doesn't own it anymore.....

This metaphor tells us discovery cannot end up would miss its value and hand it cannot be hidden man on earth and I would Trinity<sup>2</sup> if I went on My work cannot be of it wouldn't have any meaning.

that the patrimony of this into wrong hands that meaning; on the other because it belongs to the swear against the Holy hiding it.

splitted because each parts

I am sure that I have to start to propagate the contents not through Publishers, but I am looking for an Institutions capable of protecting and propagating it.

You also have to consider that the contents of the work can be censored only when my personal considerations have fallen, but no one will be permitted to change the contents of the sentences originated by a scientific documentation regarding ancient civilizations.

In the same way, what is written and originates from the Holy Scriptures will have to be drawn up in full.

The transcription into computers equipped with the latest calculation programs, scientific and graphical design will have to be performed by groups of skilled science-men and technicians .

<sup>1</sup> See: «The Cosmic Edge» on my "First Revelation's Book".

<sup>2</sup> According to Luca, Marco and Matteo in the orthodox Gospels and according to Tommaso in the Gnostic Gospels, the word of Jesus Christ is clear: " there is no forgiveness either on earth nor in sky for who swears against the Holy Trinity...", that is for who swear the message of the Origin. If I didn't propagate the discovery I would violate this Commandment given by Jesus Christ 2000 years ago.

Work will have to be performed with discretion and will require an important financial commitment to pay for the services of the various professional men. The final edition will have to be written in different languages, with an accurate supervision by scholars and science-men.

I believe that only a big titled 'Institution' will be able to insure it against a burdensome loss for the cultural patrimony of the future generations.

As concerns me personally I can state that the contents of the work do not belong to me but are "Sacred" because they come from the Universal Codes; I have discovered the Key but I did not create it! Thus I do not claim to have any right to put my knowledge to lucrative purposes.

I only want the paternity of the discovery and the recognition of my job I sustained to make it intelligible to the groups of study that are going to analyze it.

The drawing up and publications of the work, as well as its successive working out, would then involve a number of people greatly motivated. The profits will be partially devolved to help poor people given them the "knowledge" while the rest will be re-invested for the scientific research, respecting the "Law of the new ERA"<sup>3</sup> which has just begun.

What above stated could be embarrassing, but there is no other way to express.

All this is like the sowing, if no seed is sown there will be no harvest to feed the future generations.

Pier Luigi Tenci

## The "Secret Code" enclosed in the pyramids of Khufu and Khephren

Subsist an "able Code" to transmit some secrets to us that they govern the evolution of the cosmos and the life?

These secrets if it reveals to you, could conduces us to the acquaintance of precise physicist-biological ties with the DNA, in mathematical and scientific access?

From always philosophers, scientists and thinkers place this question, to the base of the existence of the homo sapiens. From always they answer themselves in cryptic terms in various keys: Para-logic, mystics or fatalistic, difficultly acceptable second canons the typical empiricist-rationales of modern science. On these canons I found the older study that I go to introduce.

<sup>3</sup> From the studies it comes out the Cosmic Calendar of the "Solar Quadrant" and from these calculations result is that the Era I called the "Holy Sphinx" has begun in February 1998. It is said that in this Era man should show more respect to the Message of the Origin handed on through the millenium. If man goes on the way he has come on to ower the last centuries, man kind risks to die out together with most of the Planet.

This mine would mean to communicate in synthesis the contents of the scientific discovery relative note to the Code transmitted to us, from the Antic Egyptians.

## Historical signals

Many students are sure of the existence remained to all today hidden or secret, of a universal origin to which in some way, they reached the clergymen of the ancient civilizations.

They suppose that on this instrument some immortals works are founded, like as an example the Egyptian Pyramids destined to hand on cosmic secrets to the posterity. Today it has been possible to discover that such Code hid in part also in strange small objects<sup>4</sup> re-emerged from the diggings in sands of Egypt in recent age and they, (belonged to the predynastic period of beyond 6000 years ago), would be repeated the "Module Cosmic" inborn in the table of King Narmer I 5, from which the units of measure to the base of the entire human knowledge derived today.

The recent discovery evidences and demonstrates that the messages of the Origin is transmitted from very long times through the eternal works of ancient civilizations, like that Maltese, Egyptian and the innumerable of Asian origin Indhuist and Buddhist, Atzeca, Mayan, Inca and from many others, much remoter, than which they exist only least objects of inestimable scientific value.

## Usefulness of the discovery

The reading of such Code will concur with the scientist's current to recognize the Origins<sup>6</sup> of the ties mathematic to us and physical constants to they you notice, like as an example that one of the symbol p. From the study it turns out like such parameters, uses you from our science experiences them, were perfectly famous sin from the night of the times. With the same instrument it is succeeded in to perceive the thin thread that can tie the knowledge to the important one, like previewed in

<sup>4</sup> They are called generically tables from make-up. Some are most important for their mathematical content and many of they are conserved in the Egyptian Museum of Turin (see bibl.)

<sup>5</sup> In the Table the main mathematical parameter is of enclosed fact the "Cosmic Module" deriving from the decomposition according to the Code transmitted from Khufu and Khephren, of the diameters of planets of our Solar System puts into effect them.

<sup>6</sup> They will be able to verify that all the human knowledge until today acquired, it is inborn in the "Cosmic Memory" in which it has been granted to reach to the men Illuminates to you, or equips you of a particular DNA, sin from the remoter ages. The Astronomers will be able to know the configuration of the solar system before the fall of the immense asteroid that upset not only the earth, but also the last planets of the Solar System.

the Code of the Pyramids of Khufu and Khephren. Such discovery will represent, for many students, one inexhaustible source for new scientific developments.

## Com' has happened the discovery and some signal on the new contents

Such acquaintances who I am about myself to diffuse through a book to divulgation<sup>7</sup> novelistic character, is landed in the hardly slid decade; the integral version of the work contains all it elaborates to you mathematic to us, physicists, chemical let alone the diagrams of the multiple transcribed architectonic decodification on precise Cosmic scale. All that properly will be rendered on digital disc them for being able intelligible to be analyzed from the students.

They are graphical numerous contents in rigid mathematical scale with the Table the 23 of the Great Geographic Atlas De Agostini and also decompositions of the numbers, brought back in the versions originates them of the Sacred witnesses Buddhist<sup>8</sup> joints until to our time. The Buddhist and Maltese codes of Tarxien, Hagar Qim, Gcantija, today decipherable, sanction the tie of the universal physical constants. You the numbers brought back from the ancient writings of Old Testament let alone geometries of plan of sculptural works of previous going back civilizations acknowledge also to approximately 25000 years ago of the Renano-Danubiano period. The work or best, the "developed Code" in 7 books, contains also the first indications that they pushed to me to feed the distance that carried subsequently to the discovery. I began to study those first slim elements in first years 70; from then the search it is developed with mathematical rigor.

## Synthesis on the contents of the "Code" Information for the reader

This short narration has the task to indicate one new dimension to us, towards which the discovery as soon as happened, gradually it will transport to us. The size of the job, enclosed in the written ones that they illustrate the contents of the discovery, is immense and in these words that will follow, here it is only a first rich introductory contact of scientific references.

Today the man is the modern technology try to reveal the mystery wraps the Egyptian treasure is not an object walls sluices of the is not constituted from

unfolding every half that offers to it, in order to that they always give Pyramids, but the true hidden between the Pyramid of Khufu and it written or valuable

<sup>7</sup> The book, repropose the spread to popular character of the arguments in issue. Attached, for the students, DVD will be a digital disc them, in which the 7 books will be transcribed in integral shape that constitute the "Code", with all the graphical representations and the adopted mathematical model

<sup>8</sup> In the text of bibliographical reference, many numbers appear that apparently are incomprehensible; but thanks to the reading of the Code transmitted from Khufu and Khephren, these numbers assume a very various configuration and become instrument essential in order to identify one multitude of happened events and to happen in our Earth.

precious stones: it is hidden in entire the its Essence that is in its essential reason for which it has been realized beyond 4500 years ago.

They<sup>9</sup> and not only the pyramid of Khufu, have yes the Great Treasure and are of value immense and hung how much at least the reason to exist of the human species in this Earth. That Treasure reaches from the Sum Wisdom inborn in the “Cosmic Memory”, the Archives of the Universal Wisdom to which it has been given to reach in the millennia<sup>10</sup> to the Illuminates men.

The Ancient Egyptian<sup>11</sup>, in particular way, were they too illuminate to you and it they were in powerful way much and strict one and had the precise task to transmit the demonstration to us of the existence of the “Cosmic Memory” and in order to allow that that happened had to realize perennial works, such that could be conserved intact in the millennia so that the Message in they hidden, it was uncovered to time debit from the man who will have to enter prepared in the new Era of according to Solar quadrant that will last others 5830,8 years.

If that Universal Message had gone dispersed<sup>12</sup> in this new Era<sup>13</sup> the man could have extinguished and that still is not admitted from the Celestial forces.

The instructions are joints until today in way graduate them and progressive in function of the evolution of the universe of which the our Earth it makes part, through the Word handed on from the various Apostles of all the Messiah<sup>14</sup> of all the times and of all the Earth, of the various remote ages; here where already the writing existed.

<sup>9</sup> The great Pyramids carriers of the immense Treasure are two: Khufu and Khephren

<sup>10</sup> The Colonizer Man in the Cosmic Genius appears ago on earth 369,7 million years, in Denoviano with the fish and the bugs and had great lungs, (to the latitude of c.a. 30°) according to the calculations lead on the led back polar stereographic projection to the consistent conical projection of Lambert in the case of h=1.

<sup>11</sup> Their task of receivers, conservatives and emitters of the Code already had been get exhausted in the time of the Hyksos Cananei in the reference years on the Solar Quadrant (sees explanation more ahead) given 1763-1387 b.C. Il patrimony to you of their Wisdom was transferred previously until to the time of the spillage from Egypt of the people of Israel: 1387 - 1280 b.C. will reappear, in this interval, one reminiscence much vague one of the ancient Wisdom, in the time of Pharaoh Tutankhamon 1361-1352 b.C.

<sup>12</sup> The people of Israel could learn that Sum Wisdom and to save of the greater part in oral shape in order to hand on it to the posterity, at least came saved the shape that subsequently will be handed on from the Word contained in Old Testament. The totality of the Message, that is the transmission of the Code, could not appear in that time because to the man still they had not been give the typical instruments to you of science experiences them modern acquired in the successes to you millennia until to our time.

<sup>13</sup> According to the achievable calculations with the Code of Khufu and Khephren, the new Was is begun in 1998 to 17,48 hours hour of Greenwich, of day 30 of January. This finds in the quadrant negative and in physics, the opposite half-sinusoid to that one is had of as soon as was finished. The first signs of this temporal change, can be made to go back with certainty, to according to world-wide conflict. In the new It was, the man comes place to acquaintance of this Cosmic truth and therefore, it will have to aware answer some, otherwise the human species could risk the extinction and great part to the earth to go destroyed..

<sup>14</sup> According to the achievable calculations with the Code of Khufu and Khephren, the new Was is begun in 1998 to 17,48 hours hour of Greenwich, of day 30 of January. In the new It was, the man comes place to acquaintance of this Cosmic truth and therefore, it will have to aware answer some, otherwise the human species could risk the extinction and great part to the earth to go destroyed.

Or well that Treasure that all are trying, has been revealed to our eye and all will be able to see it and to rejoice of the immense brightness that it will transmit, to all the men of the Earth of the present and the future generations.

Now that Treasure has been placed to our look, but also now reaffirmation the Universal instruction that imposes that to every gash granted on the mysteries of the Created one, to the man it is up greater knowledge and respect of the Universal laws, therefore as with sum Wisdom it is represented, as an example, in the transit from the Ancient one to the New Testament.

I will try to wipe the aura mystery that wraps the Code, transmitting some tangible, chosen examples with attention, between that they express the best synergy of the existing tie between the human knowledge and the Universal Wisdom, conserved in the "Cosmic Memory".

(... I perceive the Reader that I will illustrate a infinitesimals part of that he is contained in the job.)

It was the month of February of 1997, when in first evening, I invited some friends to take vision of the size<sup>15</sup> of manuscripts, pertinent to the discovery of the Password<sup>16</sup> that allowed me to approach the Code of Khufu and Khephren.

To the present friends I introduced the argument more or less as it follows:

«... This synthesis of presentation is proposed to illustrate a delicate, complex and not usual one topic much: that one handed on from the human knowledge and Important for before the time the kinsmen in the Unit.

... While You advance payment that the employment of the "Code of Khufu and Khephren", concurs also the interpretation of events puts into effect them much serious, which note the destruction of the famous statues of the Buddha preaching like contemplated in 4° the making book part of my job, entitled "the Great Legend"<sup>17</sup>

... Like you knows<sup>18</sup>, it is give approximately a year that my instinct guides to me towards the search of the emission of the Work; hour the serious happened fact to BĀMIYĀN (Afghanistan, Front Asia)<sup>19</sup> is primed perfectly in that ago part of my job, and pushed from this temporal

<sup>15</sup> They are enclosed in seven books and various hundreds of designs you execute yourself with extreme precision in the respect of the transmitted geometric scale from the Code.

<sup>16</sup> I have used this modern term in order to transmit the concept of Key of indispensable access for being able to decode the Universal invisibly but real "Codes" inborn in the pyramids of Khufu and Khephren. Later on I will not speak more than Codes, but in order to simplify the language, I will limit myself to speak the singular one and will cite of the Code... "I hope that with this my right clarification the architects planners of the Great Pyramids of To the Gizà to the Cairo "not me of will want"!..."

<sup>17</sup> This book beyond to the statues in issue contains the Calendar of the "Solar Quadrant" obtained from the decodification of the numbers brought back from the remote civilizations of Asia and the decomposition of all the main architectonic works of Asia and the Mayan civilizations, Atzeca, Inca. The contents of this book draw their origin from the bibliographical text: "Aphorisms and Speeches Of the Buddha" edited by Mario Piantelli Editors Associate joint-stock corporation to you.

<sup>18</sup> Here it is reported to my friends

<sup>19</sup> That it is happening in Front Asia is involved all the people of the Earth and from the future behaviour of the Institutions of being able of the been involved People, the future of the human species could depend and of the planet Earth, being to how much it emerges from the studies lead in reference to the "Solar Quadrant" of as soon as was begun.

coincidence, comprising also that more it is not granted me to hesitate, I will try to write up a synthesis of the discovery that can as an example be introductory to the main message contained in my job: the statues in issue, belonged to the works realized from the "Man Illuminated" in the respect of the "Universal Code of the Origin" e therefore, those men have destroyed a work that carried in is, the "Code" of the Origin.

In the fourth book, the Statue of the "Preaching Buddha"<sup>20</sup>, had been from me preventively decomposed characterizing of the constructive parameters, exactly in scale with "Cosmic Geometries of the Origin", on Table 23 of Front Asia in the equidistant conical projection of Delisle of 1 to 12.000.000, like mathematically sanctioned from the "Code", of the great pyramids of Khufu and read Khephren thanks to "password".

... I understand the embarrassment perfectly that it will create in you how much I am saying until to hour and how much I will say later on; but I will try to tranquilize to you assuring you that null of that I have written or designed or calculated, it does not belong already to the acquired human knowledge until today and the same one is worth for the innumerable ties, with the invisible world of the Important one, brought back from "the inviolate" Sacred witnesses, from which the life of the people of the Earth and the Universe depends.

I will bring back you also some tangible fragments, features from my job where you will discover with the time and the introspective patience that they, belong to acquired science from we in the passed millennia, in first part of the "Solar Quadrant"<sup>21</sup>!... »

I illustrated they and to the par I will make with you readers, some examples contained in the "Code". You must know that the archaeology students, geology, and of the ancient religions, they have worked and they continue to work untiringly, in order to characterize the reading key in order to decipher those Universal geometric outlines mathematic to us and. The scientists are sure of the existence and the fact, than they were to the base of the acquaintance sum of the great Clergymen or the Architects of the remote civilizations. The students perfectly know that they erected their works with structures studied and calculated for being able to last many millennia, so that the "Universal Code" were transmitted intact to the posterity.

## Therefore I could cite:

«... A Atzeca work, going back to year -324,58<sup>22</sup> to radius 56,32 of the Solar Quadrant, called the Pyramid of the Sun to Teotihuacan in Mexico. In this Pyramid of the Sun, there are sure currently incompressible architectonic anachronisms, as an example the anomalous angle-shot of the large-step main of access. From the design of the "Cosmic Closing" the mathematical

<sup>20</sup> The decomposition of planimetry of the statue, Iv-v century, has been carried out in the month of June of 1991, using the antilogarithm of 1,5 + the antilogarithm of the second Code Khephren from which the exact reply of the height of the equal statue to the 53,16 m. antilogarithms derives it adopts derive to you from the decodification of the numbers lists in the text "Aphorisms and Speeches to you of the Buddha" (bibl. ref.).

<sup>21</sup> The "solar quadrant" is integrating part the design of the "Cosmic Closing" that is, of fact, "password" in issue and exactly is based mathematically on the relationship of the dimensions of the converted sun using the Code of Khufu. The entire quadrant covers one circumference equivalent to the temporal conversion of the total duration of 23323,18 years.

In the first quarter as soon as passed, the events happened in the millennia are marked the rhythm in the time that have preceded to us as an example: in the year - 5830,79 are found to us to the radius projected on the normal plan to value zero and the known reference, is the "Table Sacred" of the predynastic period and at the same time to the presence of the time of Noè. While in the year the -3139,12 projection of the radius on the normal plan is worth 11,43 and in that time King Narmer Remembers us and the same table. As an example the exodus of Mosè and the 10 transmission of Commandments are found in the normal projection of the radius of value 39,31 in years - 1387,83 (even if historically it speaks itself about the 1280-90 b.C.) . If we want to slide quickly in the temporal quadrant we discover that Jesus Christ and the Gospels are found to year 0 and radius 61,4; while according to world-wide conflict it is found to the radius of 92,35. The assumed died year of birth and of Buddha turns out to be in years - 547,38; - 497,12, a good astronomer, equipped of good will and Lighting system from this give to you would be in a position to identifying the Code of Khufu.

<sup>22</sup> This date is calculable also second the words of the Buddha to II the logarithm, calculated from the decomposition of the numbers, brought back in the bibliographical text "Aphorisms and Speeches of the Buddha", thanks to the use of the Code rendered intelligible in my job.

reference emerges perfectly and geometric that inspired the Architect to angling that logical appearing perfectly to outside of proportional them, of the dimensions of the Pyramid.

This example indicates with clarity that the illuminated Architect reached the geometric information in order to write up the plan from the "Cosmic Memory". Any geometrician will be able to verify said how much, the day in which will be able to exactly see the designs contained in the job.

Now we bounce behind in the time and we return to King Narmer and in particular way, to the Votive stele the same, going back to the beginning of the protodinastica age that represents the Victoria of the King on the Delta. The origin of this stele is Hierakonpolis one sacred city of the prehistoric reign of the Egypt high. Now it is well that in this stele, is brought back the mathematical parameter that is puts into effect them and of the Perhaps it contains all recent remotest going back galaxies to The Cosmic Module, the dimensions of the mathematically tied between from  $20^{\wedge}$  the part of the Mars put into effect them, from according to the Code of the Cosmic Module is worth: 4,766.

to the base of Solar System today famous cosmos. the last appearances of the 36 billions of years ago.

Sacred Cubit, pi and the "Plutoniana"<sup>23</sup> exactly are they and have origin exactly, removal of the diameter of the diameter of Jupiter, both conversion of Khufu; that is

The unified Sacred Cubit from King Gioser<sup>24</sup>, is originated from the relationship of the third part of the Cosmic Module on the semi difference of the codes of Khufu and Khephren and is worth  $52,43 \text{ m}^2$ , also is obtained with good approximation, from the perimeter of the Sacred next side Triangle to  $800/12\text{mi}$  on the Code of Khufu and is equal to:  $52,38$  with an approximation  $936,3 \text{ ppm}^{25}$ .

The Cosmic Module, the pi, the diameter of the Earth puts into effect them according to the factor of conversion deriving from the "Code" of Khufu, is between they correlates to you from the following mathematical relation:  $(1M-p) \times 100 = \text{Earth}$  according to Khufu in the relationship of approximation of  $788,4 \text{ ppm}$ . These examples demonstrate that in that Votive Stele of Re Narmer I, it was the "Universal Code" transmitted to the Artist that modelled it, that "Code" hour all you know that is inborn in the "Cosmic Memory". From the medical report of the Egyptian Museum of Turin n° 20093, it turns out that the Cosmic Closing is registered in the circumference of  $476,63$  and it, is correlated through the product with the «pi», the exact value of the hundredth part of the "Cosmic Module".

The astronomers, will be able immediately to verify these relationships derive to you from the calculation from our Solar System directly; but land we from how many years know all our Solar System?

Sure from little years from how much he turns out reading the specialized reviews to me, in fact in the 1992 the students only could decide of the exact measures of Charon and Pluto, found with precision from the Hubble Space Telescope and, only after that its defect of astigmatism in the optical apparatus was repaired.

<sup>23</sup> The Plutoniana is the circumference in which the diameters respective of Pluto and Charon are registered, having for Pluto centre and its value turned out comprised between:  $75,05 - 75,15$  date from the arithmetic mean between  $75,3$  and  $74,8$  respective from the decodification, of the finds of the Egyptian Museum of Turin nr.15583 and 15614, as from measures brought back on the design of the 21/05/90. The Plutoniana is to the centre of the "Cosmic Closing" and on it, it rests the registered base of the "Sacred Triangle", of equal side to  $800/12\text{mi}$ . Its diameter expressed in kilometres therefore is comprised between:  $5896,78 - 5904,76$ .

<sup>24</sup> Of this King of Saqqara belonged to the III<sup>^</sup> dynasty around the 2650 b.C. it is not known very, but in its statue he is already inborn and obvious the Code that subsequently will be used in the planning that characterized the great pyramids of To the Gizà. Its Pyramid the same to steps, represents a phase of the evolutionary stage in the construction of the pyramids, when they still did not have the right shipbuilding information, in order to execute the walls to smooth face; but the nails head placed close to the pyramid, enclose the Sum tied architectonic Wisdom to the Universal Code

<sup>25</sup> Parts for million.

The astronomers will amaze, when they will state that the calculation of their diameter in kilometres of 2339,03 - 2344,77 for Pluto and of 1218,71 - 1215,21 for Charon from concluded me, in the period comprised between the October and the November of 1990, using the “discovered Password”, supplied the exact values mathematic to us and they will interrogate themselves, strong of their methodologies he rations them and he experiences them, on the reasons that have allowed this fact!

To the border of Solar System, there are some small planets that they annul the dynamic equilibrium of the gravitational laws, their discovery I have identified and calculated it in the period comprised between June and December of 1993 and is brought back in 6° the book. The small planets they are 4 and I have calls them to you: 7,5 - 3,2 - 2 - 0,35 Khufu.

Naturally all the procedure of the calculations is indicated is executed, bases to you on the dimensions of the molecule of silicon oxide<sup>26</sup>, decomposed according to the Code of Khufu, on the base of the formulas of Euclid, Pythagoras, Talete and Erone.

Returning to our Earth, we will be able as an example to cite the case of famous students of “Physics of the solid Earth<sup>27</sup>”: the Gasparini and the Mantovani authors of the same book. They will find again just the job, decomposed and reconstructed in the exact ages in which the most devastating land cataclysms happened, had to the asteroid impact. The “posthumous dater” of those events, is today definable thanks to the mathematical formulas deduced just from the “Code” of Khufu and Khephren.

That “posthumous dater” hour exists, thanks to the previous work of two great investigators: Melloni and Folghereiter. They with other less you notice students of the time, sacrificed great part of their existence in order to discover the geomagnetic<sup>28</sup> tie impressed from million of years in cliffs, that in logon with the cataclysms and the remote devastation of the Earth. Our Earth was larger, before the impact of the asteroid and v' it was to that time the second moon that still it fell on the Earth, creating the great cataclysm in Solar System, where in all probability Charon became Pluto satellite. Which were the physical characteristics of the remote Earth<sup>29</sup> before the impact?

$M_u$ = Mass of remote Earth =	5,972 <sup>24</sup> kg
$V$ = Volume of remote Earth =	1,083 <sup>21</sup> m <sup>3</sup>
$\rho$ = Density of the remote Earth =	5514,132 kg/m <sup>3</sup>
$\omega$ = Angular velocities of remote Earth =	7,292 <sup>-5</sup> radsec <sup>-1</sup>
$\gamma$ = of the orbit around to sun =	17,202 <sup>-3</sup> radmedi/day
$r_{mr}$ = remote equatorial radius =	6390141,915 m
$r_{pr}$ = remote polar radius =	6372763,454 m
$\alpha_r$ = remote polar crushing =	1/367,704
$\Delta mr$ = Mass lacking to the Earth puts into effect them =	1,863 22 kg
$ve$ = Volume of the mass expelled from Earth =	7,842 18 m <sup>3</sup>
$rm$ = medium Radius puts into effect them of the volume sphere equivalent to ellipsoid =	6371000,018 m

<sup>26</sup> The SiO molecule is unstable and the stable shape is dioxide silicon SiO<sub>2</sub>, the decomposition of this molecular geometry, joined to those of the main molecules that constitute the famous universe, has been executed in 5° the book on the base of the decodification of the Maltese works. This book contains also the calculations that reconnect the Maltese Code, to the Egyptian civilization and the consequent physical constants to connected they, and the determination of the form on the luminous and acoustic waves, reported to the elements today you notice and brought back on the periodic table of Mendeleev. The form is accessible to anyone will want to verify of the correctness.

<sup>27</sup> In this text the parameters appear also that identify the possible sequence of the events that have upset ns. the Planet.

<sup>28</sup> The geomagnetic poles of the earth and their way in the time, allow the identification of remote cataclysms. The methodology of calculation of the dater of the great impacts, is based on the led back polar stereographic projection to the consistent conical projection of Lambert in the case of h=1. These calculations brought back in 6° the book, demonstrate the agreement with the projections cited from the Authors and complete the scene, with the possibility of projections until to the origin of Solar System. The greatest catastrophe from impact from asteroid, happened in all probability, 157 million years ago and from the form, it can be gone back to 36,60 billions of years, at the moment of the origin of the universe and the big crunch.

<sup>29</sup> The form places in evidence the fact that these dimensions, already had been codified, in fact the calculation methodology considers constantly, the reference with the Code of Khufu and Khephren.

Hour we will be able to go away the Earth and to arrive with the speed of the thought, to Sirius To and Sirius B and to know their elliptic orbit, drawing it with mathematical precision to thousandth the part from the decodification of the "Table from found again make-up" to El Amra, going back to the predynastic age of 6000 years ago.

According to the "Burnham' s Handbook", the eccentricity of the ellipse is 0,7307 of Sirius B; while from the Tables it is 0,724, with one variance of the eccentricity of -0,039! In the scale of correlation between the two ellipses of 1/1,037. The ellipses and the relationship of the dimension with planets of the solar system, are to the base of the decodification of all the "Tables from make-up" that make part of the job.

In more recent age, the angle-shot of 21° 48' 5" of the trajectory of approach to the Earth of Sirius to the speed of 7,24 km to the second, comes to us indicated with mathematical precision from the Cosmic Closing.

Also the remote "Sacred Knives" in flint of 6000 years ago, riposted in the showcases of the Egyptian Museum of Turin to n° the 20096, s' will embed with absolute precision in the 4 points cardinals<sup>30</sup> of the Cosmic Closing, to confirmation who had been constructed in the absolute respect of the Universal Law.

We could also complete a wonderful travel in our famous cosmos, being based on the route indicated in the design "the Astral one" of March 1989, leaving on the route parallel to the direction of advance of Sirius towards the Earth and to discover that: to the 6,36 south<sup>31</sup> of the astral cap the travel begins cutting Gerusalemme<sup>32</sup> reflected in that point of the sky.

The travel in straight diagonal will make us to cross vOctans and vScorpius in order to reach the hours 16,40 south directed towards ΨTaurus in order to touch εCassiopea and to enter in the ellipse of Sirius in order then to reach the 6,32 south and after to have crossed Hercules106, to pass to the perfect astral polar centre in order to return to the 6,32 north and from here, to fly sent until to Velox Bernardi the 18,12 and reaching north in order to proceed until to the 3,36 north and pass through again the perfect centre of the astral cap until returning to the 3,36 south and from here, repeating the cut on Gerusalemme on vOctans and vScorpius and joints to the 16,40sud to have for the perfect Astral centre and to proceed until meeting ηErcules and to lap Hercules29 and 36/37 and to return to the 16,40 north.

To this point of the travel, we can decide to return in the Earth and from, thanks to the orbiting satellite Hubble Space Telescope, to discover that to the dimensions and proportions of the hexagon photographed on the icecap of Saturn<sup>33</sup> here (the mysterious hexagon was uncovered from the telescope spaces them in 1990, but only published in the period of 1992-1993) already had been calculated with mathematical exactitude in 6° the book in the month of December of 1993.

<sup>30</sup> They are the points key of the "discovered Password".

<sup>31</sup> They are the references on the celestial cap where the astronomers can define in union with the parallels the exact point in which the celestial object is found.

<sup>32</sup> Leaving they give: "the STARS In YEAR 2000" according to the celestial catalogue of the Yale University Observatory 1964 and establishing the relationship to climb with our land Sphere, we discover that many are the ancient cities orient placed them under... "A Good Star "..... in fact the cities: *TÁ JZZ, SCHAHPUR, SUSA, ECTABANA, UR And ERIDU, BABYLON, QASAR AMIJ, KHIRBAT, DAMASCUS, QASR To the AZRAQ, GERUSALEMME, TA JMÁ, To the GIZAH, BENIHASAN, MANFALUT, MEDINA, ASWAN, ABU SIMBEL, NAPATA, the MECCA, NAQA, ADULIS, SADDENGA and SESIBI, YENA, are correlated in mutual succession with: CANCER, distance earth sun of the Cosmic, ECLIPTICAL Closing, LION, VERGINE, 3ILEO, IZAR of BOOTES, mSERPENS CAPUT, 36/37 and 29 of HERCULES, hHERCULES and adjacent QUASAR, IHERCULES, 109 and 106 HERCULES, 21AQUILA, baQUILA, gSAGITTA, b and eDELPHINUS, 59 CYGNUS, 35 and n of PEGASUS, z of CEPHEUS, n of PEGASUS, ANETeg ALGENIB, VPISCES, TAURUS, and e of CASSIOPEA, x of CETUS, y of TAURUS, CAPRICORNO, g of VIRGO, b and ACRAb of SCORPIUS.*

<sup>33</sup> The mysterious hexagon place on the icecap of Saturn, will demand engagement very in order to identify of the nature; but its dimensions already were incorporated in the "Cosmic Closing" (the basic Design on which the Codes of mathematical conversion are melted dictate to you from Khufu and Khephren) in perfect mathematical scale.

In the study of the works realized from the remote civilizations, emerge far objects <sup>34</sup> 25000 and more years ago and between these are discovered perfectly recorded the Cosmic parameters of the plan, executed from the sculptor Artist.

I refer to two archaeological find of that time of inestimable scientific value: “the Beauty of Lespugue<sup>35</sup>” and “the Beauty of Willendorf” pertaining respective to the «Pirenaico-Aquitano» group and IV Danube the «Renano group».

These Works of prehistoric Art were realized from Artists who the students modern define “of vanguard”, because these works were visibly various from the others found again in the same territories.

The students of Archaeology will be able to see in the designs that I have decomposed with the “Code”, than in those stone bodies are inborn the “Universal Code” that becomes part in rigid mathematical scale, with the parameters of the “Cosmic Closing”.

“The Beauty of Willendorf”, has recorded also the term used in the text “Aphorisms and speeches of the Buddha” that refers to the “Saint Mother who give birth on the Flank”, second the Universal Law that she sanctions that this is the “Mother of the Messiah”!

Sure in order to comprise this jargon, it must approach the designs that represent in the diagram and the sacred witnesses of reference.

..... “Naturally to every gash of Light that is produced in the acquaintance of the Laws that govern the Universe, to the man it is up the obligation of the greater respect of the Universal Laws that us have been handed on in the millennia<sup>36</sup>” ....

I comprise your state of mind, beloveds readers, but not there are other words in order to at least express that that has been uncovered, until to contrary test.

Finally I assert in full conscience that: the content of the Work does not belong to me and thinks that it is Sacred, because it comes exactly from the “Code Universal” transmitted to us and rendered obvious in this time; I have characterized the reading key in order to approach that secret; but they have not been I to have created nothing!

The Code is secret in the immortal works, realized from the ancient Civilizations and between main like hour know also you, they are the Pyramids of Khufu and Khephren. To this point I must leave you your reflections and while job for you, you salute cordial:

<sup>34</sup> Beauties of which reference is made, belongs to ages comprised between 40000 and 25000 years ago and came decoded in my job, in designs realizes in the June of 1991 and their points cardinals to you of the architectonic structure, inserted in the "Cosmic Closing" that coincides in perfect mathematical scale, with the scale of Front, second Asia the equidistant conical projection of Delisle, in brought back scale 1 to 12000000 in the Great Geographic Atlas De Agostini.

<sup>35</sup> From its references in the "Cosmic Closing", its abdomen resides to the inside of the Sacred triangle of 800/12mi of side and I have redefined it symbolically "the Mother of Skies and the Earth".

<sup>36</sup> This is the concept that is to the base of the conservation of the human species, is the main Commandment that learns from the study of the Sacred witnesses joints until to our time, in their version it originates them and coming from all the parts of the earth.

## STRUCTURE and CONTAINED of the books that constitute the “Code”

### Title:

- 1<sup>st</sup> book: “The Cosmic Closing”<sup>37</sup>  
 2<sup>nd</sup> book: “Before the Sacred Sphinx”<sup>38</sup>  
 3<sup>rd</sup> book: “The Era Of the Sacred Sphinx”<sup>39</sup>  
 4<sup>th</sup> book: “The Great Legend”<sup>40</sup>  
 5<sup>th</sup> book: “The Sound Of the man”<sup>41</sup>  
 6<sup>th</sup> book: “The Earth is itself”<sup>42</sup>  
 7<sup>th</sup> book: “The Universal Cosmic Tables”<sup>43</sup>

<sup>37</sup> It contains the origin of the discovery of the going back Code to February 1989 and the drawing up of first is made of the calculations on Solar System, second bases the relationships to you of Khufu and Khephren. It contains the geometric relation of the projection of the ancient cities of Front Asia on the brought back Celestial Time like on: "the STARS In YEAR 2000" according to the celestial catalogue of the Yale University Observatory 1964. It contains the decomposition of the first five tables from make-up, the "Turtles and the Ibex", an amulet to shape of head of Taurus, and a God being that a knife resists, the recording representative "eternity breast-feeding" and the main Egyptian Symbols. The archaeological find decomposed they go back to the ages predynastic and of end V dynasty. These archaeological find are brought back in the text: "the PHARAOHS The TIME Of the PYRAMIDS" Bur Rizzoli Art.

<sup>38</sup> It contains the evolution of the mathematical and graphical decomposition of the until to the discovery of the tie with the Sphinx of To the Gizà to the Cairo. In particular in this text, they are decodes the archaeological finds to you predynastic held near the Egyptian Museum of Turin numbered: 15614-20093-15609-15687-17525-16396-15622-15594-15615-14612-15583-15598-15597-15596-20096-15604- and others two, of which I do not decide of the recording number. From some of these archaeological finds the form for the calculation of the "Plutoniana", that is the diameters respective of Pluto and Charon is originated. The first geometric formulation of the "Solar Quadrant" is had

<sup>39</sup> It second contains the Astronomical ties the relationships of Khufu and Khephren, reported to Solar System and to the universe known, in their mathematical reference with the "Sacred Sphinx " and the earth of Front Asia and to the points cardinals of "password", decodification of the "Code" on table 23, of the "Great Geographic Atlas De Agostini".

<sup>40</sup> It contains the definitive phase of the mathematical and geometric structuring of the calendar of the "Solar Quadrant", obtained from the decodification of the numbers brought back from the remote civilizations of Asia and the decomposition of all the main architectonic works of Asia and the Mayan civilizations, Atzeca, Inca.

<sup>41</sup> It contains the calculations that reconnect the Maltese Code to the Egyptian civilization and the consequent physical constants to connected they, and the determination of the form, on the luminous and acoustic waves reported to the elements today you notice and brought back on the periodic table of Mendeleev. It contains the tables and the form that the sound of the elements in the human body defines ""; that is the calculation of the acoustic vibrations, directly connected to the atomic radius of the constituent elements our body. From this they mathematical relation, comes to us explained the reason of the many conferences that will precede the attribution of put into effect them value of the chorister of 439,971Hz. It comes to us also illustrated the tie between the stereographic representation of the 32 crystallographic classes in their monometric state and like the elementary beings which the Diatoms, whose protoplasm cellular it is contained in a siliceous covering, geometrically are structured in the exact relationships of the Code brought back on the "Cosmic Closing" and the "Great Star". It contains also the decomposition of main present molecules in the Universe and comes represented "the Atom of Bohr 1913 H2" and the main diagrams of the laws thermodynamics of physics.

<sup>42</sup> It contains the forms for the determination of the calendar of the great land cataclysms sin from the origin of our Solar System, let alone all the forms and the calculations in order to ago go back to the physical characteristics of the earth before the immense devastation of 157 million of years, which had to the fall of an immense asteroid. It contains also the relative calculations you to the "Cosmic Cone"; that is to the form that allows us symbolically to approach the “after world” through the "Umbilical Cord" representative, the "Provisions for a journey" of support for the passage between the various dimensions.

Common subtitle to all the books:<sup>44</sup>:

To 31° the Age Buddhista In the Time Of the 80000 Years  
In the Reign of the "Turn man" Of the Wheel King Sankha  
In the time of the Sublime Metteyya (bibl. ref.).

## Religious content <sup>45</sup>

The work resumes the content of the Sacred Witnesses originates them, as they are joints until to we from several the people of the Earth sin from the remoter times. Between these witnesses there are also the Gospels Gnostic that bring back the content of the tables of Nag Hammadi, discoveries recently in Egypt.

## Scientific content

Beyond to the analytical study of Solar System and the famous universe, using the Code, has been deciphered and confronted following constant physics<sup>46</sup>:

<sup>45</sup> The messages transmitted from the remote civilizations, are unavoidable from the sacredness of the Creator and therefore no work that had to carry the Message of the Origin has been completed to outside of the respect of the Universal Law. In the last centuries, the man has entered a road that account does not hold in the due, the Messages of the Origin and that more is not granted in Was of the "Sacred Sfinge". This is one taken mine of conscience to which they are reached being how much emerges from the Message transmitted to us, rendered intelligible through the Code of Khufu and Khephren.

<sup>46</sup> The forms of calculation of the constant new physical discoveries and the relationships with those existing, are distributed in all the 7 books and are carried out also second the logarithms obtained from the decodification of the numbers of the Buddha, therefore in some cases the calculation of the constant is repeated two times.

<sup>47</sup> The temporal functions are correlated to the linear dimension, through algebraic and expressions that express in usual terms the mathematical relations of the  $\mu$ M, of the  $\mu$  and of relatives to you multiple and submultiples.

<sup>48</sup> The "Cosmic Module", the Sacred Cubit, p and the dimensions of the "Plutoniana" mathematically are tied between they and have origin in the Stele of King Narmer I, from 20^ the part of the removal of the diameter of Mars put into effect them, from the diameter of Jupiter both according to the Code of conversion of Khufu
